Deployable textile structure
1: fireproof polyester

This item was submitted to Loughborough University's Institutional Repository by the/an author.

Additional Information:

- Textile piece exhibited in the following:
  - Group exhibition ‘TRIP: Textile Research in Process’ by the Textiles Research Group, School of the Arts at the Harley Gallery, Welbeck, Nottingham (with accompanying publication) from 20th Aug - 16th Oct. (www.harleygallery.co.uk) Featuring work by the University’s Textiles Research Group (TRG), all the exhibits –supported by a digital show reel – share a common interest in the connections between craft and design processes within textiles. The work exhibited arises from individual research projects that impact on areas including industrial practice, interdisciplinary collaboration, art and design theory, and enterprise. The exhibition was also displayed at the linked, two-day TRIP Symposium at Loughborough University, which explored the role and relevance of traditional ‘hand skills’ in contemporary textiles and the value and status of craft processes. These events attracted an international audience and have a linked Vimeo video group, which further explore issues raised through these discussions. A short, illustrated publication accompanied the exhibition and there are plans to publish a book of selected papers from the symposium. Negotiations are ongoing to enable the exhibition to travel to Helsinki and Japan.
